You can play the game very easily. In essence, Clash of Clans is a hybrid of base building and RTS games. Growing up, you're sure to play at least one of each type at least once. The idea in Clash of Clans is to make your base as strong as possible using the resources you have at your disposal. Your base center is a city hall which is the main thing that you want to protect. During a raid, if the city hall falls, you lose a star to the attacker. There are other buildings in the game to use as well, including stuff like huts, gold mines, elixir mines, cannons, shooters towers, and so on. Take advantage of all these resources, your goal will be to make your base as hard as possible to attack and drop. The game will let you play against artificial intelligence players as well as real players. If you want to play the game, you must be above 13 years of age. The guardian must agree to the terms and conditions for teenagers (between 13 and 17) to play the game. The player will attack the villages of other players and will defend his/her villages. There will be different types of battles and players will go through explosions and noise. The player must use the available resources in a very effective way. Coins generated from the game will be used to build shelters and decorations. If your village is damaged, other main buildings will not be damaged. However, you should want to repair those villages and should arm again. There are some improvements in The Clash of Clans game. You can watch how your defenses are overcome and it is possible to learn from your mistakes. So, if you don't want to in the player vs. player game, you can go to participate solo. Joining clans is another reason why this game is so well known is the idea of forming clans. The clan is just a huge team of players, all of whom have their own base and try to defend them as hard as they can. The main attraction to join clans is the clan wars that are taking place. You are basically placed against other teams and your goal is to collect as many stars as possible from attacking their base. You can train troops such as archers, barbarians, pig riders, balloons, etc., and make the perfect army suitable for a particular base inmate. As such, there is a large amount of tactics involved, all of which you can control yourself and rise to the top of the competition. You may also want to have a hi-day mod.
